

Aayam Regmi

Spring boot intern, ML learner

Sallaghari , Bhaktapur • 9805391127 • aayam.regmi2003@gmail.com

 @ Aayam Regmi  @ AayamRegmi  <https://aayamregmi.com.np/>

Background in AI/ML, databases, Fullstack development using java and javascript with passion in programming

EXPERIENCE

fullstack internship

Kathmandu

Professional Computer Systems pvt ltd

Nov, 2024 - Mar, 2025

Full stack internship, learning and managing projects using Spring MVC, Spring Boot, Spring Security, Postgresql and ReactJS

EDUCATION

Bachelors

Kathmandu

The British College

Oct, 2022 - Present

Bachelors (hons) in Computer Science with database specialization

A levels

Kathmandu

Trinity International College

Sep, 2020 - May, 2022

Science faculty with computer science. GPA : 3.0

SEE

Kathmandu

Galaxy Public School

Apr, 2012 - Apr, 2020

GPA : 3.40

PROJECTS

Todo app using SpringBoot and react framework

Internship project of Professional Computer Systems made using SpringBoot backend and react frontend

- Full Crud Operations using REST API
- Postgresql configured
- Security maintained using JWT tokens and user login stored using password encryption
- frontend using ReactJS

<https://github.com/AayamRegmi/Task-Manager-Todo>

Crime Database System using pl/sql in Oracle Apex

group project made using oracle apex workspace using pl/sql, with EERD and report.

- full CRUD operations
- security maintained
- User friendly ui and customization

<https://github.com/AayamRegmi/Crime-database-system>

Event Management System using DJANGO and REST

Backend made using Django

- full CRUD operations on event, vendors, tickets, managers with REST
- Roles for accounts such as admin, EventPlanners, Vendors and Clients

https://github.com/AayamRegmi/EventMS_DJANGO

Food Recipe management system using DJANGO

Simple food recipe backend using Django and rest with CRUD operations

https://github.com/AayamRegmi/RecipePage_Django

Data processing and visualization using python libraries

Processed given data problems and picture data using python libraries numpy, pandas and matplotlib
<https://github.com/AayamRegmi/Datascience-image>

Bank Account System using C++

Basic CLI banking system using C++ able to create delete accounts, deposit withdraw balances and savings checkings account features
<https://github.com/AayamRegmi/BankingSystem>

Travel Website Sample, HTML, CSS, Javascript

Static Travel Website Template design using HTML CSS JAVASCRIPT
<https://github.com/AayamRegmi/itassessement2023>

ACHIEVEMENTS

Selected for International student exchange program

Selected for the student exchange program for the partnership between The British College and Leeds Beckett University, where a team project with leeds student is made using Arduino and various Iot devices

TRAINING/CERTIFICATIONS

Supervised Machine Learning : Regression and Classification

2024

Stanford Online, DeepLearning, Coursera

Logistic regression, Classification regression implementation using Sci-kit learn

Advanced learning Algorithms

2024

Stanford Online, DeepLearning, Coursera

Neural networks and its implementation using TensorFlow library and jupyter notebook.

Unsupervised Learning, Recommenders, Reinforcement Learning

2024

Stanford Online, DeepLearning, Coursera

k-means clustering, anomaly detection, recommenders and reinforcement learning using various python ML library

Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization

2025

Stanford Online, DeepLearning, Coursera

Python with DJANGO

2024

Mindrisers Institute of Technology

Backend and API development using DJANGO and Rest Framework

MERN STACK

2024

The British College

Frontend and Backend development using React and Node js with database deployment using MongoDB

SKILLS

ML libraries: Tensorflow, Sci-kit, Pytorch, Py libraries: Numpy, Pandas, Matplotlib, PL/SQL, Java Springboot, React with Node js, Git, Django, Rest framework

LANGUAGE

Nepali, English
